

Physician Practices: RVU Productivity

LEAN HEALTHCARE

Visits	Current # Providers	RVU/Contract Hour	Current # Providers
Less than 2.5 Visits Per Contract hour	10	Less than 4.5 RVU/hr.	25
Between 2.5 and 3 visits per Contract hour	75	Between 4.5 and 6.4 RVU/hr	35
Greater that 3 per Contract hour	15	Greater than 6.4 RVU/hr	40

RVU Productivity: is impacted by many key factors. We will work with your organization to build the right strategy for RVU productivity improvement. What is your gap between where you are now and where you want to be? We will work to understand key factors such as:

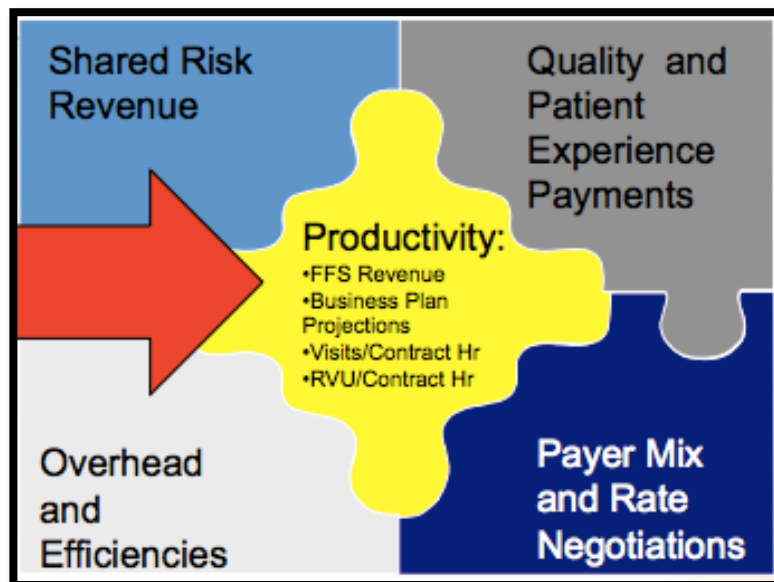

- Coding
- Scheduling
- No-shows
- Double booking
- Clinical Documentation

The profitability of Physician practices in a FFS model is inextricably linked to the Relative Value Unit (RVU). At JKA we work with our clients to improve RVU Productivity with a multi-faceted approach tailored to meet their needs. Some of the key factors of this work are: coding, schedule, visits per hour, payer mix and rate contracting. The first step is to understand both your current position and where you need to be to meet organizational goals and objectives.

Scheduling: We will work with your organization to both understand and address your organizations issues, opportunities and objectives when it comes to scheduling. Some of these will likely include: scheduling templates, appointment length by visit types, hours available for work, no-shows, double bookings, coding accuracy, etc. We can address the above in a standard way that can move your organization from schedule confusion to proactive schedule management.

Coding: Proper coding of visits, supported by pre visit work and proper EHR documentation, impacts both the amount we get paid for the visit (99212, 99213,, 99214, 99215) and the timeliness of payments. At JKA we believe that your staff and providers make the best decisions they can given the timeliness/accuracy of information available and coordination of staff, care team and provider processes. Targeting population health and closing of gaps in care, we work with providers and staff to improve outcomes, improve patient flow and ensure appropriateness of care.

What does your puzzle look like?

We work with your Practice teams to build a customized approach that identifies your opportunities to improve RVU Productivity. Focusing on patient needs, closing gaps in care, coordination of patient flow (pre visit/exam room) and appropriate documentation, we ensure key practice processes are built, documented, implemented and deployed with staff, providers and care teams to provider (RVU) productivity (10-30%)
